Executive Summary

The purpose of this report is to present the first dissemination activities for the ReCRED project, which are the project website and social media related actions. The project website is located at www.recred.eu, it has been developed and hosted by WEDIA and contains information about the project objectives, the partners involved, the project documents, pilots and software and news and events. Contact information and a contact form are also available.

Furthermore, in order to ensure high exposure of the project to the public, accounts to the most popular social media have been created; LinkedIn, Facebook, Twitter and will be updated regularly sharing project news and related to the project material.

This document is part of the WP8 - *Exploitation and Dissemination* of the ReCRED project.

Table of Contents

List of Figures

1. Introduction

1.1. Purpose and requirements

ReCRED project plays a significant role to the technological developments in the area of privacy on the WEB. It is important that the project website reflects this role and provides all the related content to inform the public in a simple way.

The following requirements have been taken into account on developing the website:

- Simple clean structure
- Allow fast and easy access to all available information
- Compatible with all popular web browsers and mobile devices

1.2. Website infrastructure

The project website have been designed, developed and hosted by WEDIA and can be found under the www.recred.eu URL.

It is a responsive website, compatible with Firefox, Chrome, MS IExplorer and viewable on mobile devices (smartphones/tablets).

Furthermore it can be efficiently browsed by mobile devices running Android, Windows or iOS.

Google analytics platform is used to measure visitor statistics like number of visits, Absolute Unique Visitors, Page Views, Average Page Views, Time on Site, Bounce Rate, New Visits, referring sites, search keywords, language of visitors, and country of visitors.

ReCRED website will provide a search function in order for the visitors to be able to search for any text in the entire website.

2. Website structure

A clean, informative and modern design has been developed to offer easy and fast access to all basic information about the project that is organized under the following structure:

- "the project" (project purpose, funding)
- "consortium" (list of participants, links, contact info)
- "news and events"
- "documents"
  - publications
  - deliverables (public)
  - dissemination material - brochures etc
- "pilots and software"

- "contact"

In the following paragraphs the content of each section is described and some screenshots from the website are provided (please note that not all the content is available by the time this deliverable is written, sample text maybe visible in the screenshots).

2.1. Section "The Project"

This is the basic section of the website describing the purpose and the value of the project, its goals and its implementation. All general information about the project is presented here.

Technical information about the implementation is presented at this section as well.

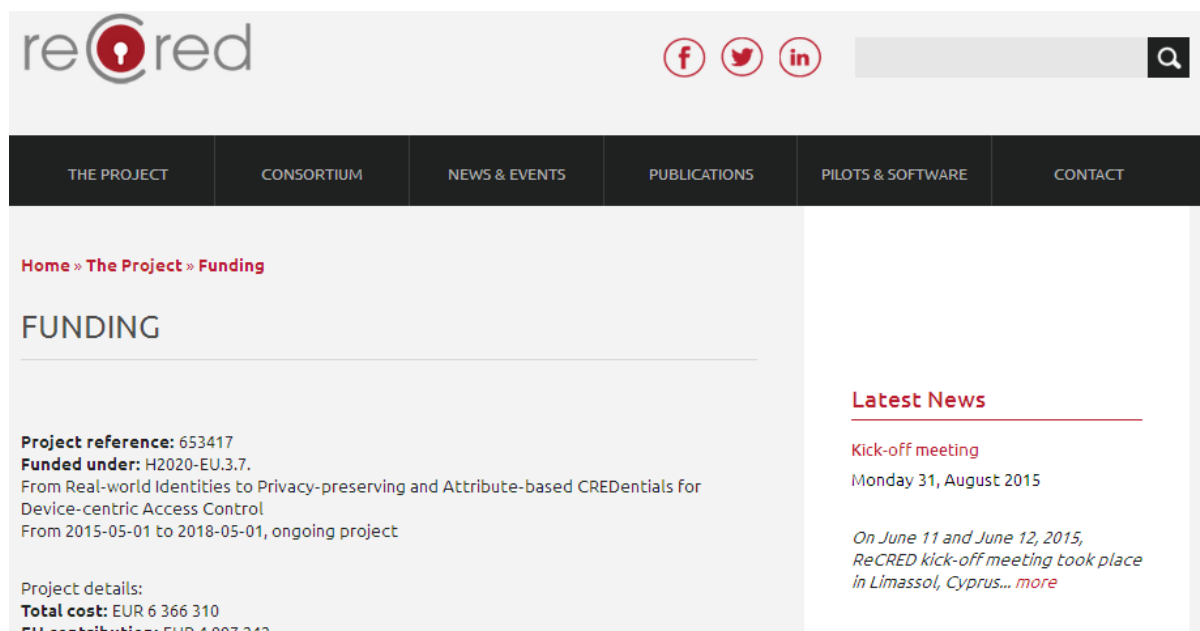

Figure 1 Project purpose page

Figure 2 Project funding page

2.2.Section "Consortium"

The ReCRED consortium is formed by industrial and academic leaders in security, privacy and Internet technologies. Consortium as a whole will address the access control related problems and challenges by developing the ReCRED framework. In this section of the website a list of the partners is presented along with direct links to their webpages.

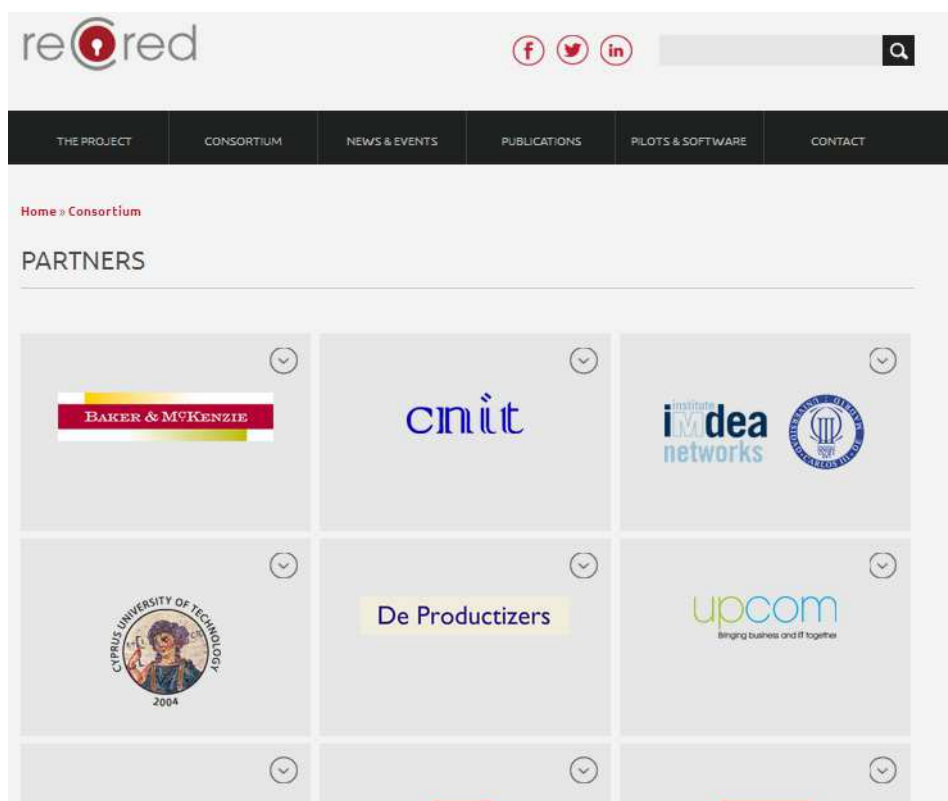

Figure 3 Part of the consortium page

2.3. Section "News and events"

In this section all the events and news related to dissemination activities of the project will be presented: Upcoming events, meetings, news related to project objectives and goals that could be interesting for partners and for visitors as well as related news and events of partners individually.

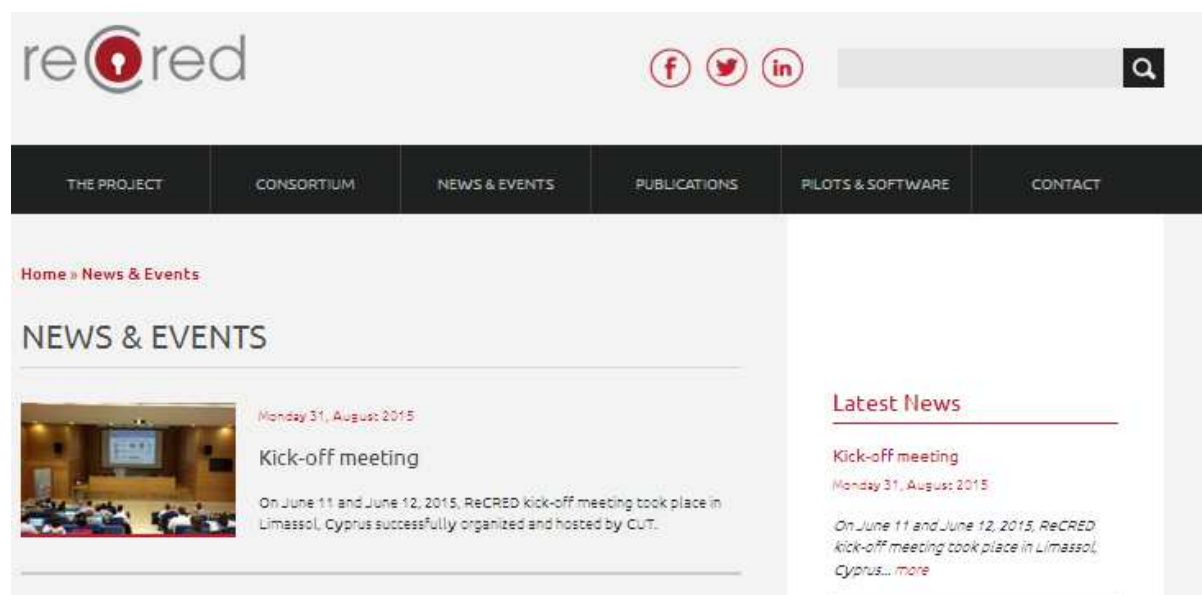

Figure 4 News & events sample page

2.4. Section "Documents"

This section will host all the public documents that are related to the project. Public deliverables, academic publications, technical papers, all the material that will be generated during the project as well as all the dissemination material such as brochures or banners will be available under three subsections: Publications, Deliverables and Dissemination material.
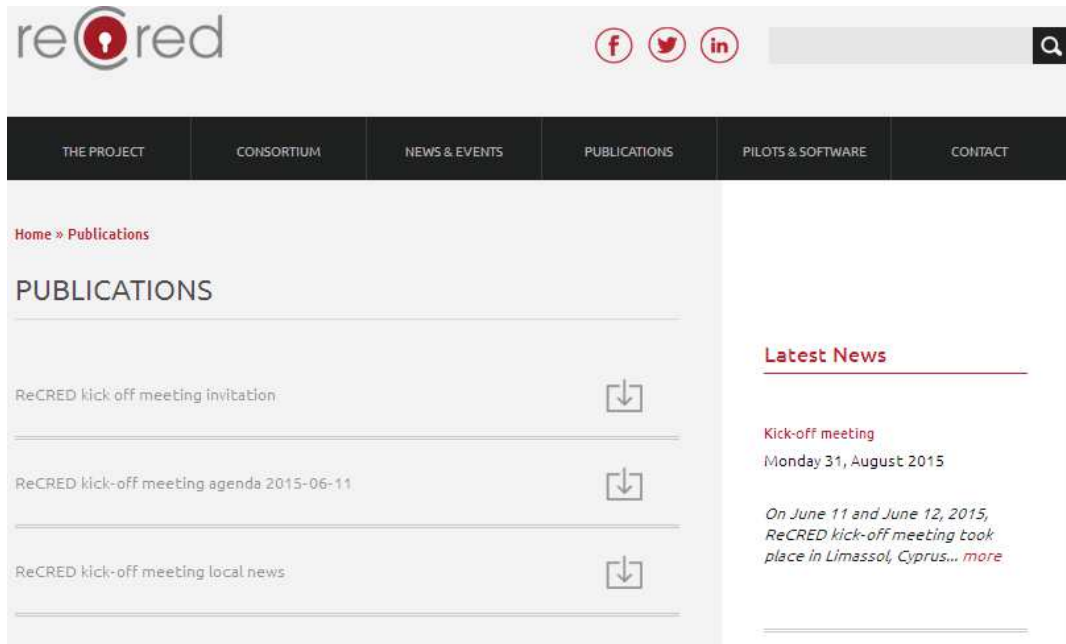

Figure 5 Publications page

2.5. Section "Pilots and software"

This is a very important section as it will include the pilot projects. Visitors can view the business cases and the pilot implementation and results facilitating the understanding of the importance of ReCRED framework in real life applications.

This section will include:

- The business cases for each pilot
- Details about the pilots
- Make available any open-source SW that may be available to the public.

The pilots are

Pilot 1: Device-centric campus Wi-Fi and web services access control

Pilot 2: Student Authentication and Offers

Pilot 3: Attributed-based age verification Online Gateway

Pilot 4: Microloan origination

2.6. Section "Contact"

A contact form will be available for everyone to be able to share his/hers thoughts or to send an inquiry to project's managers. The contact form is linked to the email address of Project Coordinator.
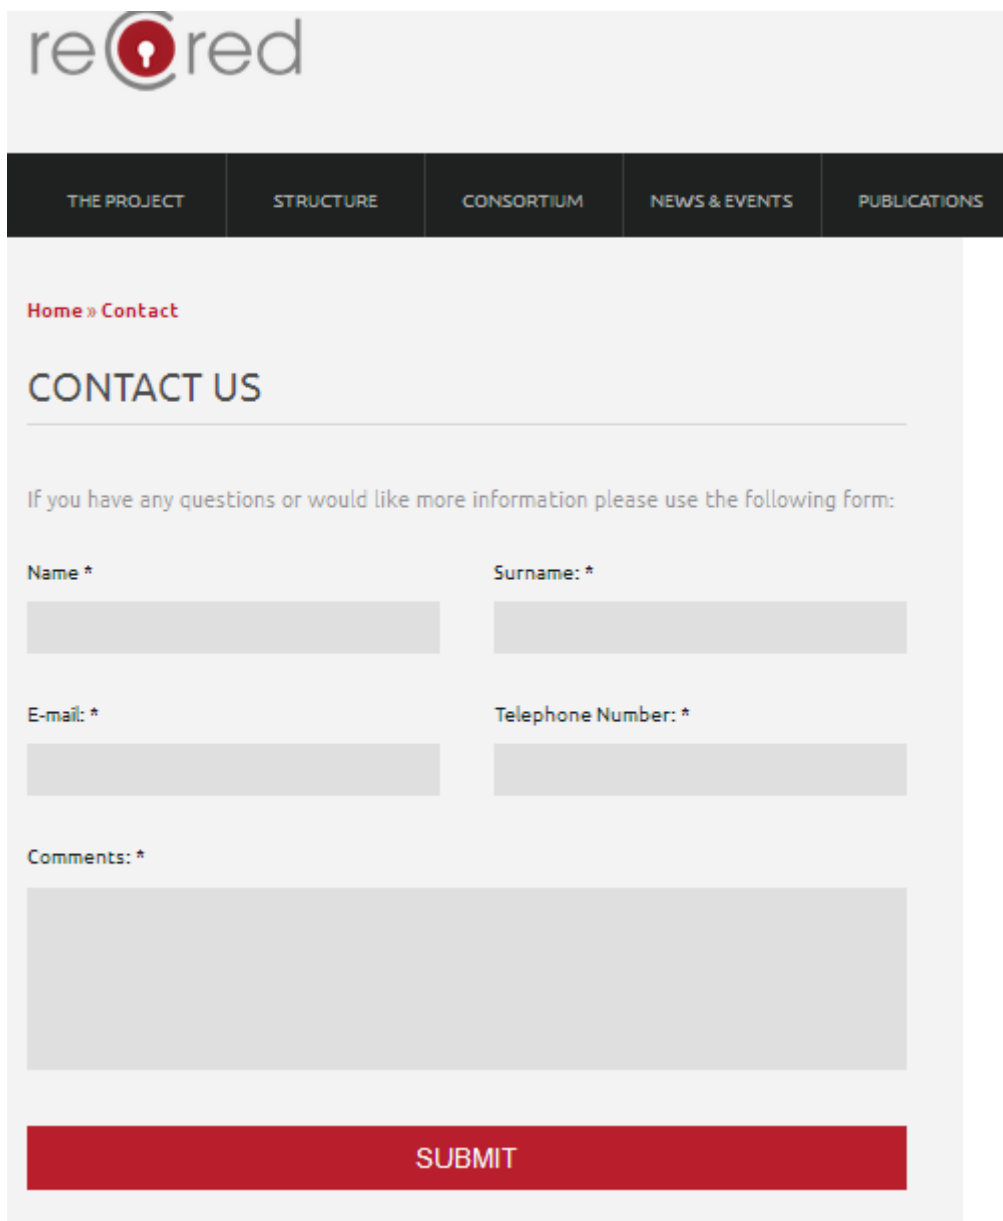

3. Other dissemination material

The dissemination plans and strategies of the project are completely described in Deliverable D8.1. In this section, dissemination material related to the project web presence and other material such as press announcements, brochures and invitations is presented.

3.1. Project presence at Social Media

Social media today are very popular with Facebook, Twitter and LinkedIn accounts increasing every day. In order to have ReCRED goals and results shared to a greater audience, accounts on LinkedIn, Facebook and Twitter have been created.

Posts in these accounts will present ReCRED news, information about the project from partner's social media pages and web sites as well as interesting articles and other on-line content than can be related to the project (research in identity and authentication field, legislation updates, etc.).

Partners will share the ReCRED posts on their social media pages as well.

3.2. Project Video

A short video describing the purpose and benefits of ReCRED framework will be available in order for the public to be able to easily understand the benefits of the ReCRED framework.

The project video will be available in the "project" section of the website and to the social media accounts, to provide an overview of project objectives.

3.3. Press Announcement, Invitations and Brochures

By the time this deliverable was written, the ReCRED kick-off meeting had took place and the appropriate Press Announcement, Invitations and Brochures have been released.

KICK-OFF MEETING

"ReCRED: From Real-world Identities to Privacy-preserving and Attribute-based CREDentials for Device-centric Access Control"

PROGRAMME

Thursday 11 June 2015, CUT, Limassol

09:00 – 09:20: Official Opening – Welcome speeches

- Minister of Education & Culture (Prof. Costas Kadis)
- Vice Rector for Economic Planning & Development (Prof. Andreas Anayiotos)
- Chair of Department of Electrical Engineering, Computer Engineering and Informatics (Prof. Andreas Poullikkas)

09:20 – 09:30: Project Overview
   (Prof. Christos Xenakis)

09:30 – 10:00: Technical Overview and Planning
   (Dr. Michael Sirivianos)

10:00 – 10:30: Coffee Break

10:30 – 12:30: Partner Introductions

12:30 – 14:00: Lunch Break

The Research Project is funded by the European Commission, H2020

Πρόγραμμα ReCRED

Συνάντηση στο ΤΕΠΑΚ

Πραγματοποιήθηκε την περασμένη Πέμπτη στο ΤΕΠΑΚ η εναρκτήρια συνάντηση του ερευνητικού προγράμματος «ReCRED: From Real-world Identities to Privacy-preserving and Attribute-based CREDentials for Device-centric Access Control», που χρηματοδοτείται με προϋπολογισμό 5 εκατ. ευρώ από την Ευρωπαϊκή Επιτροπή στο πλαίσιο του προγράμματος Horizon 2020. Η σχετική ερευνητική πρόταση υποβλήθηκε από το τμήμα Ηλεκτρολόγων Μηχανικών και Μηχανικών Η/Υ και Πληροφορικής του ΤΕΠΑΚ σε συνεργασία με τους τηλεπικοινωνιακούς κολοσσούς Telefonica και Verizon, τον παροχέα υπηρεσιών ασφάλειας υπολογιστών certSIGN, διακεκριμένα πανεπιστήμια της Ισπανίας, της Ιταλίας και της Ελλάδας, και μικρομεσαίες επιχειρήσεις τεχνολογίας από διάφορες ευρωπαϊκές χώρες. Ο βασικός σκοπός του έργου ReCRED είναι να ενοποιήσει κάτω από τις προσωπικές συσκευές των χρηστών (όπως το έξυπνο κινητό) τους μηχανισμούς ταυτοποίησης και εξουσιοδότησης (access control) για ηλεκτρονικές υπηρεσίες. Από το ΤΕΠΑΚ, στο έργο συμμετέχουν οι λέκτορες Μιχάλης Σιριβιανός και Σωτήριος Χατζής.

Αποδελτίωση:13/06/2015

Figure 9 Kick-off meeting announcement in local newspaper "Politis", June, 13th, 2015

Material like this will be released in the future as well and it will be available on project website, under the "documents" section.

4. Website and Social Media accounts Maintenance

The project website needs to be always up to date.

Sections like "news and events" and "documents" will be updated more frequently giving the visitors the opportunity to follow closely all the project results.

The content of the website will be discussed among the partners and after approval of the Technical Manager, WEDIA will update the webpages.

Apart from the website, it is very important to keep the social media accounts updated, as well.

WEDIA has created the social media accounts and will update them with content received by the project Technical Manager.
